

**Historic School in Cormier-Village
615 Cormier-Village Road**

The school was built in the heart of the village around 1880 and is still on its original site, including a single classroom with a wood stove in the middle, and antique desks. Visitors can immerse themselves in the last century, discover objects, materials, photos and historical notes that will awaken, for some, memories of their childhood and education. For others, it's an opportunity to learn a little history about the time that preceded them: teaching subjects, rural lifestyle, school management.
